Background

- The Council of Europe Development Bank (CEB) is a multilateral development bank with an exclusively social mandate. The Bank receives no aid, subsidy, or budgetary contribution from its member states to finance its activities. The necessary resources are therefore raised on the international capital markets in the form of borrowings.
- As a major instrument of the policy of solidarity in Europe, the Bank finances social projects by making available resources raised in conditions reflecting the quality of its rating (Aa1 with Moody’s, on review for upgrade, AAA with Standard & Poor’s, outlook stable and AA+ with Fitch Ratings, outlook positive).
- To ensure that it maintains access to the funds needed to pursue its activities, the Bank continues to have recourse both to large-scale borrowings in major currencies, aimed at a broad range of institutional investors, and to issues in given currencies or with specific structures corresponding to more particular requirements.
- One key pillar in the new strategic framework for 2023 – 2027 is the new capital increase. The subscribed capital increases by 78% while the Paid-In subscribed capital increases by 197% and will be financed through cash contributions from Member States – for the first time in CEB’s history.
