RESILIENCE IN ACTION: KEY LESSONS FROM EUROPEAN CITIES

23 May 2023 | 10:00-12:00 (CEST) | Remote participation

Multiple and overlapping crises are making city neighbourhoods and their communities more vulnerable. How can European cities move from vulnerability to resilience? Join us to learn from the experience of European cities that are leading the way in strengthening resilience to meet 21st century challenges. The interactive roundtable discussion will focus on two actions that are key to strengthen city resilience and to “leave no one behind”: establishing an inclusive participatory process and developing sustainable financing solutions. On one hand, inclusive participatory planning process is critical to ensure that the voices of all community groups, including those at risk of being left behind, are heard. On the other hand, developing sustainable financing solutions is vital to help cities weather multiple crises, which are placing increased pressure on city finances. The webinar will provide an opportunity for open discussion.
